

Pro Seal Premium Sealing System

Perfect protection against adherence of dirt thanks to the innovative surface sealant with Si14+ protective formula.

PRO Seal is the perfect protective coating for any surface. It effectively cleans the surface deep down using natural, environmentally friendly silicon and significantly prevents the new build-up of dirt and impurities.

Dirt, limescale, grease, and much more, remain on the surface and no longer penetrate into the pores. This means they can be cleaned away faster and with less effort, and germs dry out. Following a pore-deep thorough clean with micro-dry steam, **Pro Seal** is therefore the ideal addition for long-lasting cleanliness and hygiene.

Applications

- Before using for the first time, make sure to clean the surfaces thoroughly with micro-dry steam. The surface should be clean, free of grease, and free of chemical cleaning agents or residues.
- Now simply spray on Pro Seal directly from the bottle. Feel free to be sparing – Pro Seal is extremely productive.
- Then simply dry the surface using a clean microfibre cloth.
- No laborious application, drying or polishing is necessary with Pro Seal!
- Always use the same microfibre cloth, and do not use it for cleaning anymore as, due to the sealant, it will no longer absorb dirt.

Mode of action

The silicon molecules applied adhere electrostatically to the surfaces' capillaries and close them to form a dry and solid, yet breathable, protective coating. The surface also retains its original properties – non-slip stays non-slip, matt stays matt, and glossy stays glossy.

Living the future – rethinking hygiene

We take responsibility for conservation of nature and waste reduction – because the future belongs to our children.

Take advantage of the possibilities of modern cleaning and benefit two times over! You save energy, effort and time in your household – and we supply you with the professional product you need to do so.

The advantage for you is a pollutant-free and clean home – because you can't put a price on your health and quality of life.
